Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Hotta et al.

As per claim 1, Hotta et al. discloses a vehicle air conditioner comprising air outlets (40, 41a, 41b, 43) wherein airflow from the outlets is controlled to directly lower the temperature of the cabin (and thus the interior equipment within the cabin) before a driver enters the vehicle (column 3, lines 11-15).

As per claims 2 and 3, Hotta et al. discloses dampers 41a and 41b being placed on/against the interior equipment (i.e., the dashboard/instrument panel) of the vehicle (Figure 1).

As per claim 4, Hotta et al. discloses all of the instrument panel, steering wheel, and seat being directly cooled by the cooling of the vehicle cabin.

As per claim 5, Hotta et al. discloses a set timer control (operation starting time - column 3, lines 58-65).

As per claim 6, Hotta et al. discloses a temperature sensor 56 controlling an operation time of the system (column 3, lines 52-65).

As per claim 7, sensor 56 of Hotta et al. is also used in the regular air conditioning system of the vehicle.

As per claim 8, Hotta et al. discloses changing over to a regular air conditioning system when the engine starts (i.e., to one driven by the drive source for running the vehicle – see for example Abstract, lines 10-14).
